Experience

Plentific

London, UK -> Italy

SOFTWARE ENGINEER II -> SOFTWARE ENGINEER III -> SENIOR SOFTWARE ENGINEER

Jul 2022 - Present

- Developed multiple **Django REST API** endpoints with layered architecture and Service Layer pattern to isolate complex domain logic for scalability and maintainability.
- Led the refactoring of the entire platform to unify multiple user experiences, enabling users to interact with the application through diverse workflows and centralized data management, which streamlined key processes and allowed the business to win key clients.
- Implemented secure authentication features, including OTP verification and magic links, by adhering to OAuth standards. Enhanced account security for 50K users.
- Optimized and managed **PostgreSQL** databases: improved average query execution time by 35% through performance optimization, and reduced data inconsistencies by 65% by addressing race conditions via transaction management.
- Mentored junior developers by enforcing engineering best practices, providing regular guidance, and conducting technical interviews to support team growth and maintain high hiring standards.
- Tech stack: **Python, Django, Django-rest-framework, Celery, Postgres, SQL, Grafana, AWS, Docker.**

Iwoca

London, UK

BACKEND ENGINEER

Apr 2021 - Jul 2022

- Designed and implemented public REST APIs in **Django**, exposing them to major clients like eBay and Xero. These APIs serve thousands of customers daily with high reliability and performance.
- Developed a webhook framework to deliver real-time push notifications to partners while adhering to security protocols, enhancing system responsiveness and partner integration efficiency.
- Tech stack: **Python, Django, Postgres, Celery, RabbitMQ, Datadog, AWS, Docker.**

Lloyds Banking Group

London, UK

DATA ENGINEER

Sep 2020 - Mar 2021

- Implemented a **Spark** data pipeline to retrieve, structure, and process mortgage-related data enabling daily analysis of over 10 million records.
- Tech stack: **Spark, Python (numpy, pandas, sklearn), SQL.**

Goldman Sachs International

Warsaw, Poland

SOFTWARE ENGINEER INTERN

Jun 2020 - Aug 2020

- Designed and implemented a fully customizable rule engine to automate event handling for the company's exceptions hub, reducing manual intervention by 70% and cutting response time to critical events by 50%.
- Tech stack: **Java, Spring Kafka.**

SmartFAB

Milan, Italy

MACHINE LEARNING ENGINEER (PART-TIME)

Sep 2019 - Mar 2020

- Implemented a Machine Learning model for anomaly detection in manufacturing processes **scikit-learn, pandas, and numpy**, leveraging time-series data and statistical models to identify deviations, resulting in a 35% reduction in undetected production anomalies.
- Designed and implemented a clustering tool that groups semantically similar column names using K-means and edit-distance algorithms, enabling automated schema normalization.

MindIT Solutions

Bologna, Italy

MACHINE LEARNING ENGINEER INTERN

Jun 2019 - Sep 2019

- Implemented a Deep Reinforcement Learning model on a custom environment to optimize the work process of a manufacturing company

Education

Bocconi University

Milan, Italy

M.S. IN DATA SCIENCE, GRADUATION GRADE: 110 CUM LAUDE/110 (FIRST CLASS HONOURS)

2018 - 2020

University of Bologna

Bologna, Italy

B.ENG. IN COMPUTER SCIENCE, GRADUATION GRADE: 110 CUM LAUDE/110 (FIRST CLASS HONOURS) - TOP 30 ENGINEERING STUDENTS

2015 - 2018

KU Leuven

Leuven, Belgium

EXCHANGE PROGRAM

2020 - 2020

Initiatives & Contributions

LeadTheFuture

Italy

MENTEE

Sep 2019 - Present

- Among the few Italian students selected for a leading mentorship organization for talented students in STEM.

Bocconi Students for Data Science

Milan, Italy

CO-FOUNDER

Sep. 2019 - Dec. 2020

- Student association aimed at organizing projects and connecting students to companies in the Data Science domain.
